Cannabis Licensing
POWERED BY COMPLIA

A PURPOSE-BUILT CANNABIS LICENSING & REGISTRATION PLATFORM

As laws and regulations governing the cannabis and hemp industries continue to evolve, so has the need for technology to manage its unique regulatory challenges. Tyler's Cannabis Licensing software delivers purpose-built functionality to facilitate registrations, manage licensure, credential key stakeholders, and ensure program success.
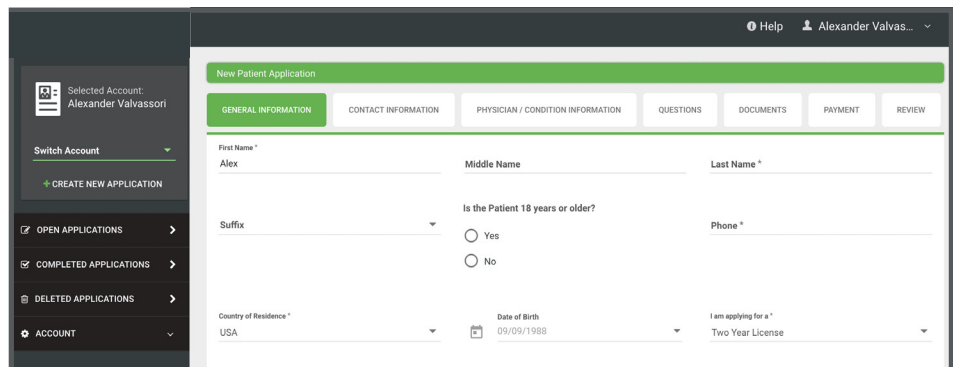

PATIENT & CAREGIVER REGISTRATION

With Tyler's Cannabis Licensing software, government agencies can manage patient registration with ease and efficiency. Patients are empowered to handle many aspects of the process through an intuitive, easy-to-use self-service portal. Cannabis Licensing includes workflows to support:

- New applicants, patient renewals, and updates such as name or address changes

- Downloadable digital licenses and/or physical licenses as needed, as well as replacement license requests

- Caregiver and health care professional functionality as needed/applicable

TYLER'S CANNABIS LICENSING SOFTWARE EMPOWERS GOVERNMENTS TO:

- Maintain a confidential registry for patients, caregivers, and health care professionals

- Track and manage a wide range of business license types

- Credential employees

- Accept and process payments

- Provide self-service portals for regulatory agencies and industry stakeholders

BUSINESS LICENSING

Cannabis regulators require a robust system to track and manage licenses that operate within their marketplace. Tyler's Cannabis Licensing software enables regulators to track and manage a range of business license types, including cultivators, manufacturers, dispensaries, transporters, testing labs, and more. The software includes workflows to support:

- New business license applications
- License renewals and automated license renewal email alerts
- Updates to existing licenses, such as changes in location or ownership

EMPLOYEE & KEY PERSONNEL CREDENTIALING

In many cannabis markets, regulators are obliged to issue occupational badges or otherwise track employees of licensed marijuana businesses. Tyler's Cannabis Licensing software supports:

- Employee registration via a public-facing, self-service portal, or restricted registration that requires an employer to sponsor an applicant
- New applicants, employee renewals, and employee updates, such as change in name or address
- Downloadable digital employee cards and/or printed employee cards as needed, as well as replacement card requests

---

CLIENTS

Tyler's Cannabis Licensing software supports regulatory agencies across the U.S., including:

- Alabama
- Arkansas
- Illinois
- Mississippi
- Missouri
- New Jersey
- West Virginia
