

Digital Disbursements for Election Worker Payments

Provide election workers with instant access to wages, including multiple options to receive their money.

MODERN PAYMENT OPTIONS

- Money is loaded directly to the recipient's account and funds can be used immediately
- Pre-paid debit card can be swiped anywhere Mastercard® is accepted
- Recipients also have multiple options to use their money — bank transfer, PayPal®, Venmo®, gift card redemption, paper check, or charitable contribution
- Disbursements handles all account servicing once payment has been made

ELIMINATE PAPER CHECKS

Making payments to poll workers by paper check creates unnecessary inefficiencies. Taking paper checks out of the equation eliminates:

- Unclaimed property and escheatment
- Bank account reconciliation headaches
- Check fraud
- Returned, lost, and stolen checks
- High check-issuing costs

YOU DECIDE WHEN AND HOW TO PAY

Implementing Tyler's Disbursements into your election worker payment workflow is easier than you think! Disbursements adapts to your processes — pay workers daily, or once per election cycle.

We work hard to get people to come and work the polls. That's a big commitment on their part, working from 6 a.m. to 9 p.m. We don't want to deter election workers from coming back.

I believed digital disbursements would be beneficial when I first heard about it. I'm happy it has worked even better than originally anticipated. Providing our poll workers payments on election day, and with options they want, has been of great benefit to them and my office.

Receiving debit cards and saving the taxpayers check-producing costs encourages them to continue playing a vital role in county elections and our democracy."
